Weekly Update

Group Name/number:_____Group 6_____

Date of update :___March 23,2020_____

	Item
1.	What our group has done since last week: 1. Learn the skills to write a project proposal and review the problem statement to prepare for the project proposal 2. Review the “7 strep to a successful presentation, learn the presentation skills 3. Learn the more efficient development model for multiple members develop simultaneous by using the Github. 4. Finished the basic code of the framework that the frontend and backend can interact now. 5. Searched information online about how to import mysql into our flask framework and how to deploy it in the mobile server.
2.	Questions, issues? 1. In the slides for project proposal it mentioned “Cost/budge”, we don’t understand the meaning of cost. Is the cost means how much investment we need for the whole project? If so, should we give a real number ? 2. Can we use the templates for the frontend? If we can, how to define the boundary of plagiarism?
3.	We would like feedback on… Is our working schedule behind other groups and above question
4.	What we plan to do this week: 1. Implement the functions we list before in the framework and beautify the frontend UI 2. Finish the employee and customers’ code. 3. Deliver the project proposal.
