

Weekly Update

Group Name/number: _____ **Group 6** _____

Date of update (this will always be a Tuesday): _____ **2020/4/6** _____

Item

1.	<p>What our group has done since last week:</p> <p>After the basic framework was built, we moved on to the specific work of coding and the future plan in the last week, including understanding and selecting different types and backends of cloud servers, starting to research and program a series of functions related to the appointments with more details and discuss the divisions, the time management and the demonstration type of the demonstration video in week 8 in our group</p>
2.	<p>Questions, issues?</p> <p>1. After viewing different types of cloud servers, we confused with the difference between different types of the servers they sell like CDN, CVM and so on.</p> <p>2. In the demonstration video in week 8, what stage should we finish with the system at least to meet your expectations? what content should the video be involved?</p>
3.	<p>We would like feedback on...</p> <p>1. We want to know the brief introduction or explanation of the different types of cloud servers, so that we can understand each of them and make our choice.</p> <p>2. We hope that there will be a detailed document talking about the necessary format and contents in the demonstration video that we need to focus on</p>
4.	<p>What we plan to do this week:</p> <p>This week we will pay more attention on the functionalities of the system and try to finish more to meet our plan. The rest time of the week we should start to make the demonstration video, like determining the presentation form of the video, collecting the materials needed for the video and write the script for the interpretation of the video content.</p>
