

## Weekly Update

Group Name/number: \_\_\_\_\_ Group 6 \_\_\_\_\_

Date of update: \_\_\_\_\_ May 4, 2020 \_\_\_\_\_

### Item

1.	<p>What our group has done since last week:</p> <ol style="list-style-type: none"><li>1. Reviewed the documentation guidelines and the UCD grade descriptors.</li><li>2. Discussed issues in the Q&amp;A live session on the group meeting.</li><li>3. Finished the appointment database implementation in SQLAlchemy.</li><li>4. Continued developing the online chatting and language switching parts.</li><li>5. Reviewed 'web development' module referring to the building of a 'secure' website.</li><li>6. Checked the information about 'reliability' and the ways of its implementation.</li><li>7. Wrote the first draft of the User Document.</li></ol>
2.	<p>Questions, issues?</p> <ol style="list-style-type: none"><li>1. What does 'reliability' mean in the problem statement? We have learnt it now.</li><li>2. It is hard to refresh the web page by receiving notifications from the other side at the same time. We are working on this problem.</li></ol>
3.	<p>We would like feedback on...</p> <p>The first draft of the User and System Documents.</p>
4.	<p>What we plan to do this week:</p> <ol style="list-style-type: none"><li>1. Finish the first draft of System and User Documents.</li><li>2. Finish the implementation of online chatting and language switching.</li><li>3. Deliver the sprint of the above functions.</li><li>4. Fix the bug of the notification part which we have not completed.</li><li>5. Develop two non-functional requirements.</li><li>6. Update the version of deployment on the cloud server after all the functions are finished developing.</li></ol>
